

Yoyo - pendant

Design: C.F. Møller Architects

Yoyo is a range of elegant interior light fixtures with low height.

C.F. Møller Architects are the masters of Yoyo's elegant design with distinct curves and slim profiles. Concluded by sharp profiles at both ends, the characteristic parable results in a unique and sculptural look and the impression of a floating luminaire.

Being edge lit the Yoyo fixtures are free from dots and shadows from other components. The light from the edge is guided through the LGP and sent downwards by the top reflector.

Shades for Yoyo are opalised or microprismatic, and the latter is elegant without visible prisms.
